

FREQUENTLY ASKED QUESTIONS & INSTRUCTIONS FOR USE

HOW TO INITIATE PAINT FLOW FOR POSCA MARKERS?

Shake the marker vigorously with the cap securely attached in order to move the ball inside the barrel.

On a test sheet, press the tip down several times to start the paint flowing.

Express your creativity.

Replace the cap tightly after use to ensure protection and longevity of the tip.

WHY SHOULD I TEST POSCA MARKERS BEFORE USE?

Paint flow is controlled by a valve and a piston mechanism. To regulate and optimize the flow, try on a piece of paper before use.

HOW TO AVOID PAINT BLEED?

The valve and piston mechanism prevents bleeding. To control the flow, press the tip down on scrap paper when priming POSCA.

HOW TO INITIATE PAINT FLOW FOR THE PCF-350 BRUSH MARKER ?

Shake the marker vigorously with the cap securely attached in order to move the ball inside the barrel.

Remove the cap and the protection on the push button.

Press and hold the push button to start the paint flowing.

TIP: You do not need to press the push button for too long to initiate paint flow.

HOW TO MAKE THE COLOR PERMANENT?

POSCA's water-based paint is permanent on porous surfaces and removable on non-porous surfaces. Depending on the surface, there are ways to optimize color adhesion including:

- applying a varnish
- baking items in an oven
- ironing the surface

For further information on curing finished artwork on over 55 surfaces see POSCA's Test Results Guide.

HOW TO BLEND COLORS?

Create your own custom colors by mixing the paint from different markers directly on the surface while the paint is wet.

TIP: You can rinse the nibs with water to clean.

HOW TO OVERLAY COLORS?

Opaque and dense, POSCA's paint dries quickly, allowing you to cover a layer by another one within a minute and without smudges.

TIP: Wait until the first layer has dried before applying another one.

HOW TO CORRECT A MISTAKE?

If you have missed a line or got the wrong color: overlay! With POSCA Markers, you can overlay colors as many times as you wish.

HOW TO STORE YOUR MARKERS?

POSCA Markers can be stored horizontally or vertically. However, it is preferable to store The PCF-350 Brush Markers horizontally. Replace caps tightly after use. Store markers in a cool, dry place.

FREQUENTLY ASKED QUESTIONS & INSTRUCTIONS FOR USE

WHAT SURFACES CAN POSCA MARKERS BE USED ON?

POSCA Markers are water-based pigment paint markers that can write on almost any surface.

We have tested POSCA's performance on more than 55 surfaces. For further information on surface application, see POSCA's Test Results Guide.

IS POSCA'S PAINT PERMANENT?

POSCA Paint is permanent on porous surfaces, and removable on non porous surfaces, such as glass. For further information on surface adhesion, see POSCA's Test Results Guide.

WHAT IS THE DRYING TIME?

The drying time is extremely quick. Generally, the paint dries quicker on porous surfaces than on smooth ones. In any case, wait a few minutes and the paint will be dry.

CAN I DILUTE THE PAINT ONCE IT HAS DRIED?

Once the paint has dried... It is too late to dilute it but you can still overlay colors!

WHAT SHOULD I DO WHEN THE TIP HAS DRIED OUT?

Don't panic if you have lost the cap and the tip has completely dried. Thanks to the piston and valve mechanism, you can flow paint once again by priming the POSCA marker again.

TIP: If the nib is extremely dry, you can rinse it with water. The nibs of some of the markers can also be removed.

DO I NEED SPECIFIC SUPPLIES TO USE POSCA MARKERS?

You do not need materials such as a brush, a cloth or water; POSCA Markers enable you to paint neatly and accurately directly from the pen. Simply pick your surface and create.

CAN I USE POSCA AS MAKE-UP?

POSCA can easily be cleaned off the skin and is non-toxic. However, it is not a cosmetic and has not been tested against cosmetics or dermatology standards. The manufacturer will therefore not be responsible for possible reactions on the skin if used incorrectly.

TIP: The paint can easily be removed with soap and water if it comes into contact with skin.

IS POSCA PAINT TOXIC?

POSCA's paint is water-based, odorless and made without solvents. In fact, beekeepers use it to identify the queen in beehives! A color corresponds to each year which enables them to determine the insect's age.

CAN CHILDREN USE POSCA MARKERS?

POSCA water-based markers are odorless and totally safe for children to use. However, as they are quite technical, we recommend them for children over 5 years old.

TIP: If you have lost the cap and the tip is dry, you can soak the tip to continue to use the marker.

IS POSCA RECOMMENDED FOR CREATIVE WORKSHOPS WITH CHILDREN?

With these fun and handy markers, kids can play with paint without getting dirty. POSCA is often used in activity centers.

TIP: Use recycled items (egg cartons, cardboard, paper tubes, jars and more) to create a variety of fun art projects for kids.
